

# New!

# A unique service for the care sector from UKQCS

**UK Quality Care Solutions is the premier source of Quality Management support for the Care and Nursery sectors.**

We provide a complete service. In addition to a loose-leaf manual, your customised policies and procedures will be online on your own dedicated website managed by UKQCS. Where you operate from more than one site, each will have its own content - constantly updated. Multi-level password access for staff enables you to control access and provide audit evidence that documents have been read - and re-read when updated!

All your policies, procedures and working documents will be compliant with legislation, in addition to ISO9001, Investors in People, and Investors in Excellence. It also provides all you need to generate the new Annual Quality Assurance Assessment (AQAA) for CSCI.

Whether your business is a care home, a domiciliary care provider or a nursery, we will provide best practice systems and support in implementing procedures, and provide the necessary evidence of having done it!

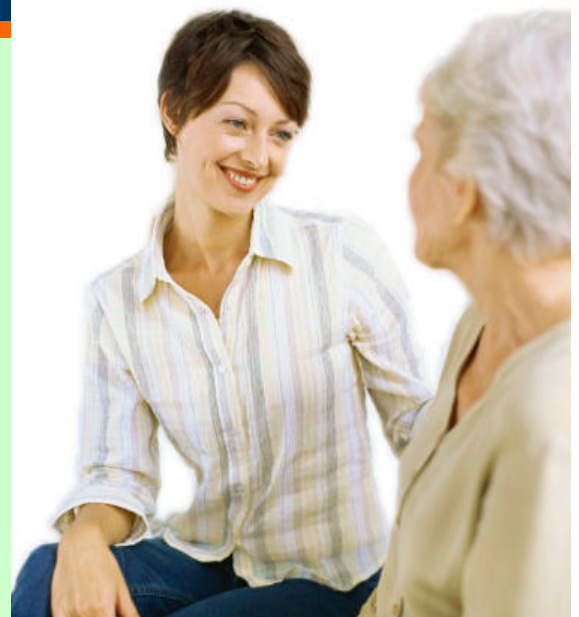

**This is a quality management support package you really should explore!** It could save you a lot of time and add considerably to the service you provide.

**The *only* support package you will ever need for management and training!**

**Quality Care Solutions from [www.ukqcs.com](http://www.ukqcs.com)**

# Workforce Development & Training from UKQCS

**Workforce development and training is vital to the success of your business and you will receive direct support including NVQ and other training managed by our training experts.**

We provide workplace delivery solutions to ensure candidates progress as quickly as possible. Our fees are very competitive and we are always happy to negotiate where you have specific issues or require repeat volumes.

We will ensure the highest quality training whether it is for a level 2 NVQ or a Registered Manager Award.

Whether your business is a care home, a domiciliary care provider or a nursery, we will help in establishing best practice systems and a qualified workforce.

## Our package to you!

- ❑ Training & development advice and guidance.
- ❑ High quality NVQ training and assessment up to Level 4/RMA.
- ❑ Induction training including LDAF.
- ❑ Effective and flexible delivery models to suite candidate and employer requirements.
- ❑ Comprehensive induction – including skills scan, essential skill guidance and learning materials.
- ❑ Work based assessments, action planning and portfolio management.
- ❑ Internal verification and external Awarding Body certification.
- ❑ Funding advice and guidance from experts in the field.
